RECOMANDARE

Prezenta recomandare o facem tuturor celor interesati de montajul mecanic si electric, punerea in functiune si urmarirea in exploatare a microhidrocentralelor.

Firma ELECTRO-SERVICE RB a montat pentru compania noastra peste 20 de unitati cu puteri de la 500kW la 5MW pe vaile raurilor Teleajen, Ialomita, Doftana si Prahova.

Montajul a constat in instalarea si punerea in functiune atat a echipamentelor hidromecanice (gratare, vane stavilar, instalatii de curatat gratare, vane de admisie, vane by-pass, etc) cat si a echipamentelor hidroelectrice (turbine hidraulice, generatoare electrice, multiplicatoare, grupuri hidraulice, dulapuri de forta si automatizare cu cablurile aferente intre echipamente si dulapuri).

Personalul cu inalta calificare a demonstrat competenta si seriozitate in executarea lucrarilor in conditii de calitate impuse de standardele europene, respectand termenele contractuale.
