

SOFERT- SA  
CET

## RECOMANDARE

Societatea SOFERT-SA Bacau asigura consumul propriu de energie termica si partial pe cel de energie electrica cu instalatia CET care este dotata cu 4 cazane de abur ( 120 t/h, 100 ata, 540 °C ) si 2 turbogeneratoare de 12 MW.

Lucrarile de reparatie mai complexe la utilajele mari se executa numai prin firme specializate dupa selectarea prealabila a ofertelor.

Pentru lucrarile de reparatie aparute la turbogeneratorul CTR 12 in februarie 1999 s-a dat o atentie deosebita selectarii firmei ce urma sa execute reparatia date fiind problemele deosebite ce urmau sa fie rezolvate si termenul scurt de executare.

In aceste conditii speciale lucrarile de reparatie au fost preluate de firma cu cea mai buna prestanta in faza de oferta si care indeplina toate conditiile impuse de catre SOFERT-SA Bacau. Aceasta firma este S.C. ELECTROSERVICE Bucuresti.

Modul in care a decurs preluarea lucrarii a dovedit ca firma are specialisti de valoare care stiu sa respecte conditiile impuse unei lucrari complexe si au solutii pentru acestea.

De asemenea s-a evidentiat calitatea lucrarilor efectuate si seriozitatea personalului muncitor care a lucrat direct la aceasta lucrare.

Finalizarea lucrarilor evidentiaza la firma ELECTROSERVICE RB Bucuresti importanta acordata termenelor de contract prin oncheierea la timp a lucrarilor, fapt deosebit in conditiile economiei romanesti.

Toate aceste fapte fac din firma ELECTROSERVICE RB Bucuresti un partener de dorit in lucrarile in care se angajeaza.

## LETTER OF RECOMMENDATION

The company SOFERT – SA Bacau ensures its own thermal energy consumption and partially the electric power for the CET installation which is equipped with 4 steam boilers (120 t/h, 100 ata, 540<sup>0</sup>C) and 2 12 MW turbo-generators.

The more complex repairing works on large machines are executed only by specialized companies following the prior selection of offers.

For the repairing works on the CTR 12 turbo-generator which had to be performed on February 1999, we paid a special attention to selecting the company to perform them, because of the serious problems that had to be solved and the short execution deadline.

Under these special circumstances, the repairing works were undertaken by the company which had the most widely known fame in the offering phase and complied with all the requirements set down by SOFERT – SA Bacau. This company is **S.C. ELECTROSERVICE Bucuresti**.

The way in which the works were taken over proved that this company works with valuable experts who comply with the requirements set down for a complex work and have solutions for them.

Moreover, the quality of the performed works was high and the personnel directly working for these works was professional.

The completion of the works shows the importance that the company ELECTROSERVICE RB Bucuresti pays to complying with the contract deadlines, which is special given the conditions in the Romanian economy.

All these indicate that the company ELECTROSERVICE RB Bucuresti is a partner you want to work with.
